

Dear Parents and Carers 19.11.18

This week in literacy we will continue to explore How to Catch a Star. We will be thinking about different ways to catch the star and what else we could catch in space.

In maths we will begin to experiment with repeating patterns and look at some 3d shapes eg. cylinders and cones when making our own rockets. We will continue to develop our number and counting skills alongside these activities.

We will begin learning some Christmas songs for our performance this week so you may well hear the children singing them at home!

Words of the Week

- We would appreciate any boxes for junk modeling and old kitchen rolls to make rockets with.
- Please ensure that we have your current mobile phone number on our records if you wish to be set up with Easy Peasy.
- If you don't wish to be set up with Easy Peasy please return the slip that was issued via Parent mail.
- We will notify you soon which character your child has chosen to be, with costume suggestions.
- We are short of spare tights and socks. Any donations would be very welcome!
