

Reading Expectation

Help support your child's reading by listening to them read for a short while each day. We ask that every child reads five times or more each week, and can already see better progress in those that have done this so far in Year 2. Children are rewarded with the opportunity to read with Diesel the dog, a dip in the prize box and a stamp on their reading passport.

Learn through Computing then DT

Children can use the internet to research a famous landmark. They could find out where it is, why it is famous, what it is used for, etc. Then they can make a model of their chosen landmark. It can be a landmark in England, or it can be from further afield. They can choose from any country, and any landmark they are interested in. The landmark could be a man-made or natural landmark. They can make their models from any range of materials and should include some information with their landmark to show what they have learnt about it.

Learn through Art

Children can create a piece of artwork based on traditional art from another country, for example Australian Aboriginal art or Moroccan pattern work. This could include painting, printing or sewing.

Here are some enrichment activities that your child can complete at home to support their learning this coming term.

Please help your child complete two or more activities of their choice. Children should bring their projects into school by **Friday 8th February**, though projects are welcome in before then, as and when they are completed.

Globetrotters!

Homework for Year 2, Term 3

Learn through Geography

Can you create a country in a box?
You may choose any foreign country in the world!

In your box put in different items that are related to that country. You might include a flag, a map, some money, interesting facts, traditional clothes, phrases in the language they speak.

Learn through Design and Technology

Try some different foods that are traditional in other countries. Try to be as adventurous as you can! Bring in some food to share menu to show what you have tried. Don't forget to look up where your food would have originally come from! The World Foods aisle in Tesco is a good place to start with this.

Learn through Reading

Visit the library and find some stories that are set in other countries.

Write a book review comparing them. Tell us which you would recommend and why.

Learn through Exploring

Exploring boots at the ready? Use books, the internet (you could use other people's experiences too) to find out about another country. Make a fact file about this country. You could compare it with England to find any similarities or differences.
