

## DT

Our rainforest book corner needs some extra inhabitants! Try and re-use things from around your home including paper plates and plastic bottles to create some rainforest animals. This website has a great step by step guide you could adapt:

<https://gluesticksquandrops.com/parrot-paper-plate-craft/>

## English

Many people every year travel to the Amazon rainforest to see its wonders! Use what you know about the rainforest to write a persuasive leaflet, encouraging people to visit and telling them what things they could expect to see/do!

## Maths

The Amazon rainforest is much more humid than England! Can you find out the temperature over a week and plot it on a line graph? Maybe you could include Hastings weather too, so you can see the difference!

## Our Changing World (Rainforest) Homework

### Year 5-Term 3

Please complete at least 2 of these, of your child's choice, by the Friday 8<sup>th</sup> February.

## Geography

Deforestation is a big problem, where many trees are being cut down every day. This leads to habitats being lost and is also contributing to global warming! Make a poster, describing what deforestation is, how the rainforests are changing because of it and what we can do to help! Some of the most informative posters may even be put up around school- to help encourage recycling!

## Science

The rainforest is full of fascinating plants, including plants that eat insects! Can you create a poster or leaflet to inform people about all the fascinating plants that exist- you could use the internet or books from the library to help you find out more about them!

## Media

David Attenborough produces some fantastic documentaries on the rainforest. Watch Planet Earth- Jungles (episode 8) on Netflix or BBC iPlayer:

<https://www.bbc.co.uk/iplayer/episode/b0074tqb/planet-earth-8-jungles>

Once you have done this create a poster to show me what you have learnt!
